

## How to properly attach the Kangaroo Joey IV pole clamp to the IV pole

**STEP 1** – place the IV pole clamp on the larger portion of the IV pole, approximately 1" below the chrome adjustment and assure the clamp is seated against the IV pole as shown.

**STEP 2** – tighten the bolt clamp so it is positioned in the MIDDLE of the pole and NOT on the edge.

**CAUTION** – do NOT position and then tighten the bolt clamp to the side of the IV pole as this will bend the bolt and make the clamp inoperable.
